Art Unit: 1795

1. Applicant's election with traverse of Group I in the reply filed on 9 March 2010 is acknowledged. The traversal is on the grounds that the subject matter in Groups I and III is so similar that examination of both of these groups would not place undue burden on the examiner. This is not found persuasive because these two groups are materially different because, for example, Group III does not contain a fuel supply while Group I includes a fuel supply. In addition, Group III recites the generator recharging the metal-air converter; a limitation not part of Group I. Because of these differences, there would be undue burden on the examiner to examine both of these groups.

The requirement is still deemed proper and is therefore made FINAL.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 4 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, line 1, the "a" should be replaced by --the-- to render the same clear Markush terminology.

In claim 6, line 1, the "a" should be replaced by --the-- to render the same clear Markush terminology. Also, the word "including" in line 2 of claim 6 should be changed to --consisting of-- to recite proper Markush language.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hsu et al. teach a fuel cell used to power a vehicle as does the patent to West.

5. The following is an examiner's statement of reasons for allowance: the closest prior art of record, Hsu et al., does not teach a power supply system that includes a generator that supplies electricity to the metal-air converter as applicant has claimed along with a fuel supply that supplies fuel to the generator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 571-272-1287. The examiner can normally be reached on Monday-Friday, 8:00-4:30.
